> PROFESSIONAL SUMMARY

An aspiring Cybersecurity undergraduate specializing in network security, secure application development, and system administration. Currently in the second year of study at SLIIT with hands-on experience in digital forensics, penetration testing, networking, and web development.

> EDUCATION

• BSc (Hons) in IT - Cyber Security Specialization

SLIIT, Malabe Campus

2023 - Present

Currently in Year 2, Semester 1

• Advanced Level (A/L)

Mahanama College, Colombo 03

2023

Subjects: 1B, 2C

• Ordinary Level (O/L)

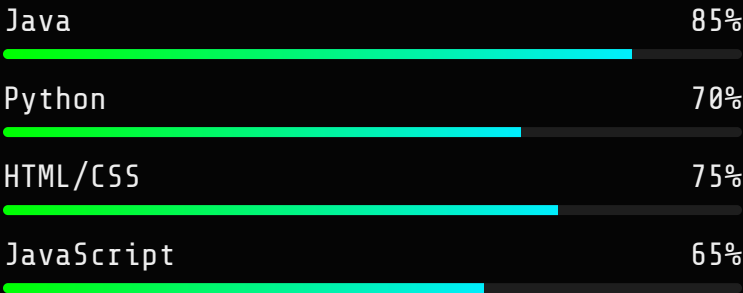

Mahanama College, Colombo 03

2020

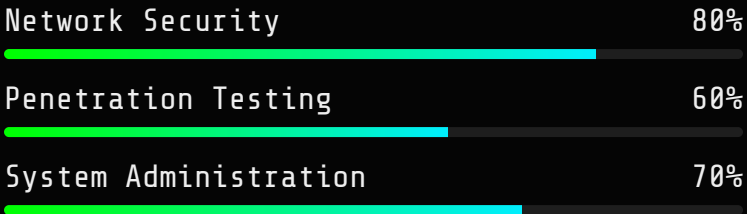

Achieved 2A, 3B, 4C

> TECHNICAL SKILLS

Programming Languages

Cybersecurity Skills

Tools & Technologies: Cisco Packet Tracer, Arduino, Linux, Git, Eclipse, VS Code

> PROJECTS

Industrial Networking System

Designed and implemented a secure network system using Cisco Packet Tracer. Features include VLANs, routing protocols, and firewall configurations for industrial use.

Cisco Networking Security

Home Automation System

Developed an Arduino-based system supporting remote control, voice commands, and automated sensors for environmental monitoring.

Arduino IoT Sensors

Wedding Planning System

Created a web-based wedding planning and vendor management system using Java and Eclipse. Implemented OOP concepts and data structures for efficient performance.

Java Web Dev Eclipse

> COURSES & MODULES

Year 1 - Semester 2

Data Structures and Algorithms	Discrete Mathematics (Python)
Object Oriented Programming (Java)	Technical Writing

Year 1 - Semester 1

Data Communication and Networks	Introduction to Programming (Java)
Mathematics for Computing	Fundamentals of Computing
